

Thank you to those people who were able to come to help at the damp work day in September. We were able to get some preservative painted on the outside of the Coronation Hut to help it survive in the bad weather. There is continuing work on the inside - making shelving so that the storage space can be used more efficiently and this is almost complete, thanks to David Hill.

The damp weather meant we were unable to completely remove all the marquees and this was saved for a later, drier date.

Some of the tree branches and weeds were cleared from around the West Hut in preparation for the work done by the volunteers on the Wates work day later in September. This day was a great success and those involved had really enjoyed it. There is a good chance that we will be given another donation from them as well! We will now be able to make improvements to the furnishings on the inside.

Much of the rubbish has now been cleared and the rubbish/bonfire area is gradually improving.

The work to repair and replace posts and markers for the Orienteering Courses has now been completed.

We are obtaining quotes for different ways to improve the pool area and in the meantime we have set up a survey of usage of the pool to see if major improvements would be worthwhile. There is still time to complete this at: <http://www.surveymonkey.com/s/2B59C6P>

There are many plans in hand for fitness trails and running courses; for covered trolley storage and other items.

The Friends of Heyswood is a support group for the campsite and properties at Heyswood which belongs to Girlguiding Greater London West. The purpose of the Friends of Heyswood is to assist with fundraising, maintenance and promoting the use of the Heyswood campsite and its facilities for the benefit of members of Girlguiding, and to support the site through specific projects. We hope that with the improvements which are now beginning to be seen we will be able to encourage more people to use the facilities.
